

# MINIMUM CLEARANCE

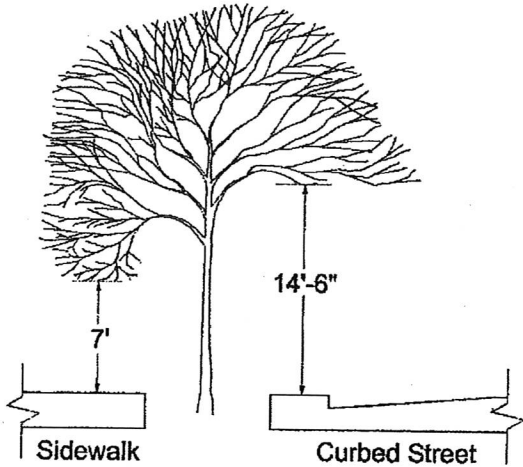

## CONDITION A

Typical Street Intersection

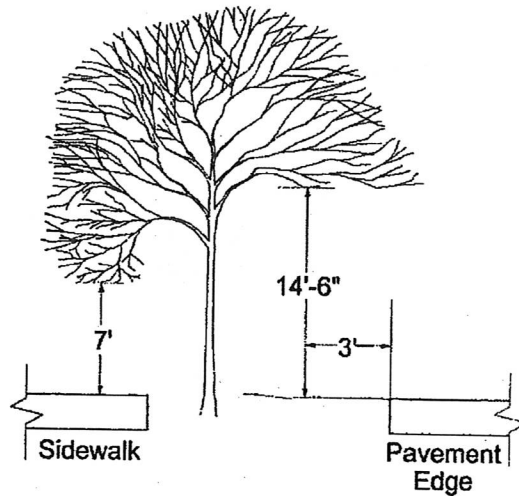

**Intersection:** The minimum standard calls for 25 feet of visibility along each property line. Trim any landscaping (except a tree) to a height of not more than 30 inches above the curb. Also low or overhanging tree branches should be removed to allow drivers an unobstructed view, and shrubbery not allowed to encroach into the street or sidewalk.

## CONDITION B

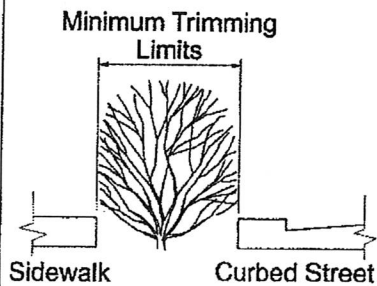

**TREES:** These minimum clearances must be maintained.

## CONDITION C

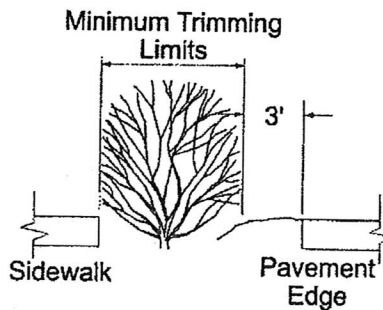

**TREES:** These minimum clearances must be maintained.

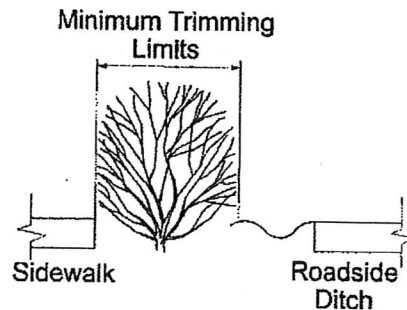

## CONDITION D

## CONDITION E

## CONDITION F

**VEGETATION:** All growth should be trimmed back so as not to encroach into the curb and sidewalk. It's recommended that you trim an extra couple of feet to minimize the frequency of trimming.
